REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The prior art of record fails to teach or render obvious a stent and balloon catheter combination comprising, among other features, a stent; and a balloon catheter having an outer and inner balloon, wherein the burst pressure of the inner balloon is less than a burst pressure of the outer balloon, wherein the length of the outer balloon is greater than the length of the stent and a length of the inner balloon is less than the length of the stent. This arrangement helps to prevent dog-boning, as indicated by the applicant in the response filed on 10/14/05.

The closest prior art would be US 6,136,011 to Stambaugh. However, Stambaugh fails to teach the inner balloon having a length that is less than the length of the stent and also fails to disclose the inner balloon having a burst pressure that is less than a burst pressure of the outer balloon. There are other references in the cited prior art that teaches a balloon catheter with dual balloons. However, the prior art does not provide any motivation to arrange a stent on a dual balloon catheter as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
